

CONFERENCE EXHIBITOR

Honoring those who are being challenged by cancer by harnessing the healing powers of wind, water and sail.

Our vision is put into action through providing meaningful experiences of relief from the challenges of living with cancer for nominated patients and their loved ones.

Sail Beyond Cancer Vermont provides free three-hour sails with cancer patients and their caregivers and loved ones on their own private sail. Our vision is put into action through providing meaningful experiences of relief from the challenges of living with cancer for cancer patients and their loved ones. We focus on providing private, individual sailing excursions that create opportunities to rebuild courage and make lasting memories, while leaving a positive imprint on society. Anyone in treatment for cancer, any type of cancer, no matter where they reside, or what age they are eligible to come sailing with us.

The organization operates out of Burlington and serves the State of Vermont and beyond by providing free 3-hour private sailing excursions lead by 18 experienced Captains and countless crew and volunteers. We provide a service addressing needs of cancer patients not often spoken of: quality of life, social support, psychosocial support, and stress-reduction.

No matter where on the continuum of health and terminal disease a cancer patient's prognosis may fall, the diagnosis of cancer and the treatments that follow bring with them commonly occurring experiences for the patient: stress, anxiety, depression, and unease. We seek to improve the quality of life and provide psychosocial support for this population.

Geographic Region(s) Served: Serve all of the State of Vermont and beyond. Outreach is growing including NH, NY, ME, RI and MA as well as Montreal, Canada.

Diversity and Inclusion Program: Sail Beyond Cancer hopes to partner with the Leadership Champlain Class of 2022 in an initiative that will allow Sail Beyond Cancer VT to reach a more socio-economically diverse population within the Burlington Community.

Our first objective will be to educate and create greater awareness at the board and volunteer level. Subsequently, we will identify community partner organizations and new board members that may help the organization understand and solve barriers of access to SBC-VT mission sails.
